

2019 SRS Board of Directors Candidate

Frank A.J.L. Scheer, PhD

It is my honor and pleasure to be considered as a candidate to serve on the SRS Board of Directors as a Director-at-Large. I have been actively involved in the SRS organization for many years. I have been a member of the SRS since 2004, have served on the SRS Research Committee (2014-2016), the Scientific Offerings Committee (2015-2016), was the SRS Circadian Section Chair (2014-2016; initiating the annual combined SRS-SRBR symposium), and am currently on the Program Committee for the SLEEP meeting (2016-2019; about to rotate off). I have greatly enjoyed working together in these committees over the years, seeing the time, effort and commitment everybody is putting in to advance the field and community they love. I am committed to the advancement of sleep and circadian training, discovery and translation. I have been engaged in sleep and circadian research and training for over 20 years. I am the Director of the Medical Chronobiology Program at Brigham and Women's Hospital (BWH), a Neuroscientist at BWH, and an Associate Professor of Medicine at Harvard Medical School.

I hope to serve on the SRS Board of Directors to help further strengthen the society and its offerings, including the SLEEP meeting (joint SRS-AASM with unique translational value) as well as the SRS-independent ASCS research meeting.
